

# SRT, Inc.

Scientific Research & Technology, Inc.

## Our Company

*SRT, Inc. has experienced and highly qualified professionals providing quality, on time, and on budget solutions to our customers' environmental problems. We offer services from initial site investigation and characterization to site clean-up and remediation to monitoring and disposal for sites contaminated with hazardous, mixed, and radioactive waste. We provide guidance to our customers regarding regulatory compliance issues and prepare documentation for federal, state, and local regulators.*

*SRT, Inc. personnel have been involved in the environmental field, or in related work areas, for over ten years. Our experiences and successes in this work were the reasons why we formed our company. Over the years, we have established contacts and proved to our clients that we deliver quality products, on schedule, and on budget. We have worked either as employees of National Laboratories, subcontractors to National Laboratories, and/or independent consultants.*

*Currently, we have two full-time employees and a number of highly-qualified, experienced individuals that significantly augment our capabilities in the areas listed in our expertise. Additionally, SRT, Inc. maintains a close working relationship with the University of Texas-El Paso and will draw upon that resource pool when additional support is required to meet work scope requirements.*

*SRT, Inc. is based in El Paso, Texas, and is a Hispanic Woman owned 8(a) Certified Small Disadvantaged Business. The company was incorporated in 2002 and awarded 8(a) status in January 2005. Our 8(a) certification provides a contracting mechanism that our clients may find useful in utilizing our services and meeting their needs.*

Solving Problems  
Is Our Business

# SRT, Inc.

Scientific Research & Technology, Inc.
